ABOUT ME

I am a Computer Engineering graduate who is motivated and detail-oriented, with hands-on experience in web development. During my internship and academic projects, I gained practical skills in building real-world web applications. I am passionate about web development and eager to keep learning, work together on diverse projects, and deliver meaningful results as I continue to grow as a Junior Web Developer.

EXPERIENCE

Web Developer - Forth Smart Service Public Co., Ltd. (Intern)

April 2024 - June 2024

- Database system design
- Customize the front and back end of the website using HTML, CSS, JavaScript and PHP.
- Ensured that the data added by the admin was dynamically
- Displayed on the user interface for seamless user access.
- Modify and improve according to requests from other departments.
- Fetch data and display it on the UI.
- Add new menus within the website

Front End Developer - Freelance

June 2025 - July 2025

- Freelance Project using React, React-Native, and Nextjs. Includes creating demo app such as ride-hailing. Also developed web platforms for car rental , lawyer landing page and backoffice systems for mentioned apps and websites.
- Car Rental Project: Developed an admin login system for the back-office and implemented a promotion system that allows setting discounts for individual cars, with an option to select specific vehicles and a language switch feature.
- Lawyer and Ride-Hailing Project: Customized the user interface (UI) according to Figma designs and client requirements.
- Developed the Lawyer Landing Page with an integrated AI Chat feature that allows users to ask legal-related questions, powered by Gemini 2.0 API.

PROJECTS

DekDek App - Senior Project

- Developed a cross-platform mobile application for early childhood development assessment based on the DSPM framework.
- Enabled parents to register, manage child profiles, and perform age-appropriate developmental assessments.
- Built secure role-based access features allowing caregivers to monitor and manage groups of children with parent-approved permissions.
- Implemented intuitive notifications to remind users of upcoming assessments for continuous tracking.
- Used React Native for front-end development and integrated Node.js with MySQL for robust backend and data storage.

Portfolio - Personal Project

- Designed and developed a responsive portfolio website using React.js, Tailwind CSS, and JavaScript to showcase personal projects.
- Built reusable components, applied modern UI/UX design practices, and deployed the website for cross-browser accessibility.

Blog Management Website - Personal Project

- Designed and developed a website for writing and managing blog posts using a block-based structure (headers, paragraphs, code blocks, images) to give users flexibility in organizing and customizing content.
- Implemented project management features, allowing users to save and manage multiple projects within the system.
- Practiced building complex React applications, handling dynamic and flexible form structures, integrating with a backend system, and uploading files to Cloudinary.
- Stored structured data in a real database with support for scalability and reliability.
- Tech Stack: React, Tailwind CSS, Node.js, Express, MySQL, TiDB , Cloudinary

Ecommerce Website (BDStore) - Personal Project

- Designed and developed a comprehensive e-commerce platform with user authentication, product management, shopping cart, and order processing systems.
- Implemented multi-role user management (Customer/Admin) with secure authentication, password recovery, and role-based access control.
- Built complete product catalog management with inventory tracking, image uploads, and real-time stock updates for seamless administration.
- Developed order processing workflow from checkout to delivery, including payment management, status tracking, and automated inventory updates.
- Created admin dashboard with sales analytics, revenue tracking, and business intelligence features for performance monitoring.
- Practiced building complex Next.js applications with server-side rendering, dynamic form handling, database integration, and cloud file storage.
- Stored structured data in PostgreSQL with Prisma ORM, ensuring scalability, reliability, and data integrity with proper relationships and transactions.
- Tech Stack: Next.js , TypeScript, Tailwind CSS, PostgreSQL, Prisma ORM, NextAuth.js, ImageKit

EDUCATION

Bachelor of Computer Engineering
Naresuan University

June 2021 - Mar 2025

HARD SKILLS

Programming Languages : Javascript , Typescript , HTML , CSS , SQL , PHP

Framework & Library : Front - end : React.js , Next.js , React Native , Tailwind CSS
Back - end : Node.js , Express.js , MySQL , PostgreSQL , Prisma ORM

Tools : Github , DBBeaver , Postman , Figma , Canva , Vercel , VS Code , Cursor

Language : Thai (Native) , English (Intermediate – reading technical documents and basic conversation)

SOFT SKILLS

Collaboration , Time Management , Adaptability , Active Learning , Creativity , Communication
